

Dual Iris Scanner IriUniverse-Two

The BioEnable Iri Universe-Two Dual Iris Scanner is one of the most advanced in high technology for fast and accurate dual iris recognition. The IriUniverse-Two was designed in an intuitive binocular form, thus allowing the speedy capture of images with the minimum level of prompting very worthwhile asset for Aadhaar applications as well as many other systems employing biometric authentication. It strictly follows the most strict ISO standards on quality assurance, which ensures reliability and accuracy in identification. IriUniverse-Two is more secure and efficient as it operates seamlessly, hence it becomes the ultimate choice for the secure iris-based biometric solutions in various settings.

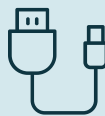

FEATURES

High Accuracy

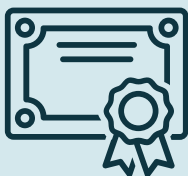

Dual Iris

USB Powered

**Robust and
Durable**

STQC Certified

OS Support

Dual Iris Scanner IriUniverse-Two

Specifications

Dimension	184.5 x 150.5 x 57.3 mm
Weight	<1 kg
Iris Image Pixel Resolution	640 x 480 pixels
Image Output	Meets or exceeds ISO 19794-6
Capture Distance (In Mm)	>=150 mm
Number Of Simultaneous Eye Captures	2
Capture Volume (Width/Height/Depth)	>20x15x12mm
Spatial Resolution, Pixel Resolution	>60%@4.0 Lp/mm, >21 Pixels/mm
OS Compatibility	Windows 7/10/11, both 32 and 64 bit versionsLinux Ubuntu 12.04, 14.04 and 16.04 LTSAndroid 4.0 and above
Iris Diameter (In Pixel)	>210
Capture Time	<1 second
Exposure Time	<33ms
Image Wavelength	700-900 nm
Scan Type	Progressive
Capture Mode	Auto Capture with built-in quality check
Interface	USB 2, USB-If Certified
Power	USB (500 mA at 5V)
Biometric Data Interchange Format	ISO 19794-6 for IRIS Image, ISO 29794-6 for image quality
