

BioFace MSD150

MSD150 is cost efficient Facial recognition terminal having multimode biometrics technology. Multi identificational and validational methods that captures thru by RFID card, Fingerprint and Face capture combination. Its color display with 2.8 inch TFT having high-definition display .Also supports TCP/IP communication,P2P network real-time communication, realize transport data with WIFI. Contactless Face capture attendance, easy to adjust.

FEATURES

Fingerprint

RFID Card

USB Powered

Battery Backup

Face Capture

OS Support

Specifications

Faces Capacity	1500
Fingerprint Capacity	5000
ID Card Capacity	5000
Record Capacity	500000
Card Type	Proximity card
Camera Lens	Two high-definition cameras
Identify Mode	Face, Finger, Card, Password
Identification Time	≤ 1.5 sec
Fingerprint Scanner Type	600 DPI Optical Sensor
Communication	TCP/IP, USB
Display	2.8" Color LCD Screen
Installation Type	Wall Mounted
Identification Method	Face
Voice Prompt	Yes
Battery	Inbuilt Battery Back-up
Finger Placement Angle	360° rotation allowed
